

Please read my comments in the 3/23/17 Board Meeting:

As you are likely aware, all Delta concerns affect residents of Solano County in many ways. I cannot attend your meeting in person, but I want you to have my input about the grave concerns I have that about this Agenda Item (#11).

First, the Delta Stewardship Council has not given the public adequate notice of this meeting. That smacks of cronyism, not good stewardship.

Second, the Delta Tunnels have not received the public support nor the cost-benefit analysis support that are necessary before the tunnels are accepted as a reasonable—much less *preferred*--water alternative.

Third, there are no Federal permits to proceed with the Delta Tunnels project, and favoring this project in light of devastating recent water infrastructure failures in California is simply reckless.

Please do not amend the Delta Plan without considerable research into 21<sup>st</sup> century water solutions, a comprehensive cost-benefit analysis, a thorough and transparent public review process, and widespread support from Delta residents and neighbors.

Sincerely,  
Karlyn H. Lewis  
Solano County resident
